1. Introduction to DRM-X 5.0 Cloud Storage

DRM-X 5.0 Cloud Storage is a cloud-based object storage service designed for storing protected video, audio, image, and document content.

With DRM-X 5.0 Cloud Storage, you can securely, reliably, and efficiently store and distribute your content, while seamlessly integrating with the ZJGet browser for online playback.

Key Advantages of DRM-X 5.0 Cloud Storage

- High reliability and high availability
- Global accelerated access
- Secure and isolated storage space for each account
- Clear and transparent usage and cost reports
- Easy video embedding into websites or systems

2. Pricing Plans and Fees

2.1 Storage Space Fees

- Different account types include different storage capacities
- Monthly and yearly subscription plans are supported
- Storage capacity can be upgraded at any time

2.2 Traffic Fees

- Different account types include different traffic quotas
- Traffic is mainly used for content playback, download, or access

- Excess traffic is charged at USD 0.04 per GB

2.3 Additional Notes

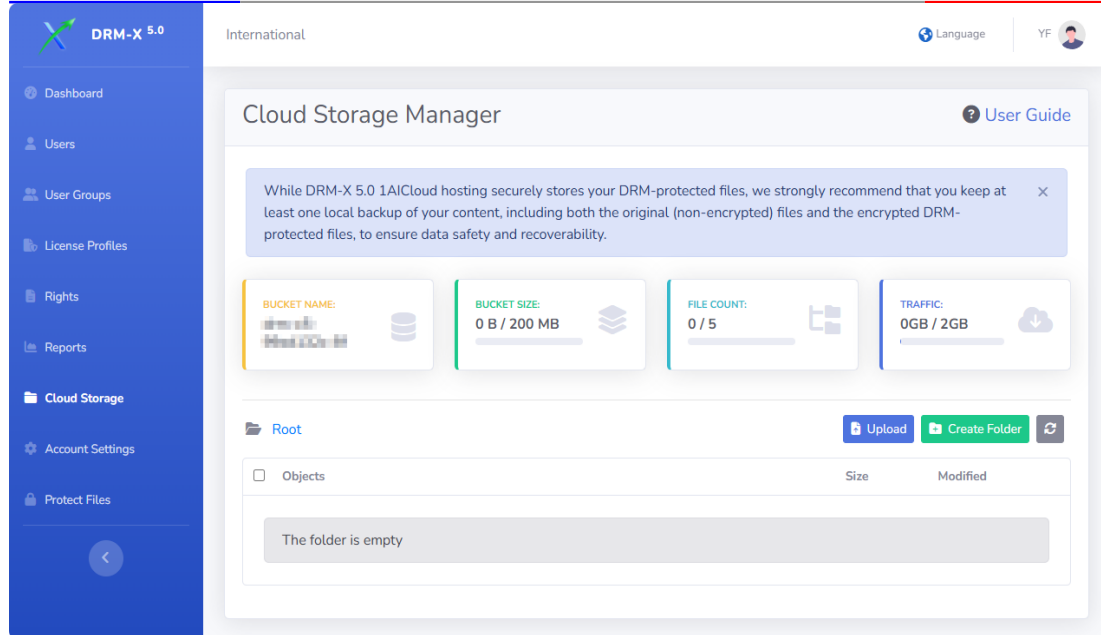

- All usage and charges can be viewed in real time in the back-end reports
- Notice: When the account balance is insufficient, the cloud storage service will be temporarily suspended. Please renew your subscription or add funds in time.

3. Account Types and Quotas

Account Type	Price (USD)	Storage	File Limit	Traffic
Free Trial	FREE	1GB	40	10GB
Basic	\$100	20G	100	100GB
Premier	\$220	50G	400	300GB
Business Windows	\$320	100G	1000	700GB
Business Pro	\$440	150G	2000	1.5TB
Enterprise	\$600	300G	3000	3TB

4. How to Use DRM-X 5.0 Cloud Storage

When you access the [DRM-X 5.0 Cloud Storage](#) page for the first time, the system will automatically complete the initialization process. After that, you will see the Cloud Storage management interface.

5. Cloud Storage Management Features

The Cloud Storage management page provides a complete and intuitive file management experience, allowing users to efficiently manage cloud files and folders.

5.1. Upload Files

- **Steps:**

1. Enter the Cloud Storage page
2. Click the **Upload** button
3. Select local files and confirm upload

The screenshot shows the DRM-X 5.0 Cloud Storage Manager interface. On the left is a blue sidebar with navigation options: Dashboard, Users, User Groups, License Profiles, Rights, Reports, Cloud Storage, Account Settings, and Protect Files. The main content area is titled 'Cloud Storage Manager' and includes a 'User Guide' link. A warning message states: 'While DRM-X 5.0 1AICloud hosting securely stores your DRM-protected files, we strongly recommend that you keep at least one local backup of your content, including both the original (non-encrypted) files and the encrypted DRM-protected files, to ensure data safety and recoverability.' Below this are four summary cards: 'BUCKET NAME' (blurred), 'BUCKET SIZE' (0 B / 200 MB), 'FILE COUNT' (0 / 5), and 'TRAFFIC' (0GB / 2GB). The 'Root' directory is shown with 'Upload' and 'Create Folder' buttons. A dashed box contains the text 'Drag and drop files here or' and a 'Choose File' button. A list of supported formats is provided: .mp4, .webm, .mov, .mp3, .wav, .pdf, .jpg, .png, .gif, .bmp, .webp, .html, .htm, .css, .js, .json, .xml, .txt. At the bottom, a table header shows 'Objects', 'Size', and 'Modified', with a message 'The folder is empty' below it.

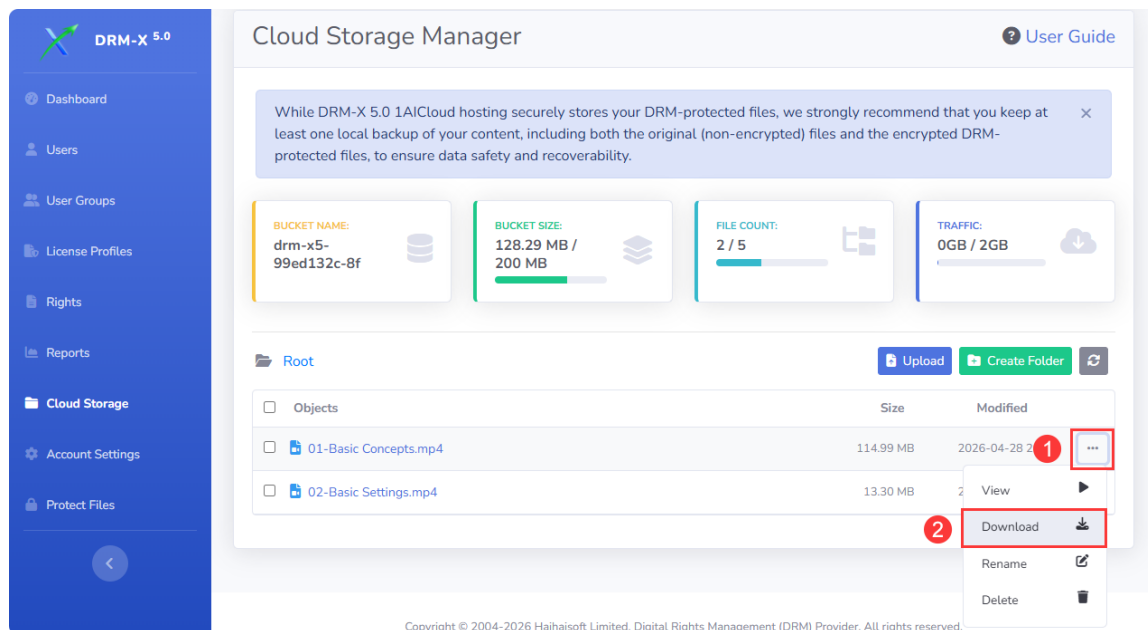

This screenshot shows the same DRM-X 5.0 Cloud Storage Manager interface, but with two files being uploaded. The summary cards now show: 'BUCKET SIZE' (13.30 MB / 200 MB) and 'FILE COUNT' (1 / 5). The 'Root' directory has 'Upload' and 'Create Folder' buttons. A dashed box displays the upload progress for two files: '01-Basic Concepts.mp4' (39.25 MB / 114.99 MB, 34% complete, 2min34s remaining) and '02-Basic Settings.mp4' (13.30 MB / 13.30 MB, 100% complete, 17s total time, 786.02 KB/s avg speed). A 'Cancel All Uploads' button is visible. The table at the bottom still shows 'The folder is empty'.

5.2. Download Files

Click the icon on the right side of the file list and select **Download** from
DRM-X 5.0 Cloud Storage User Guide

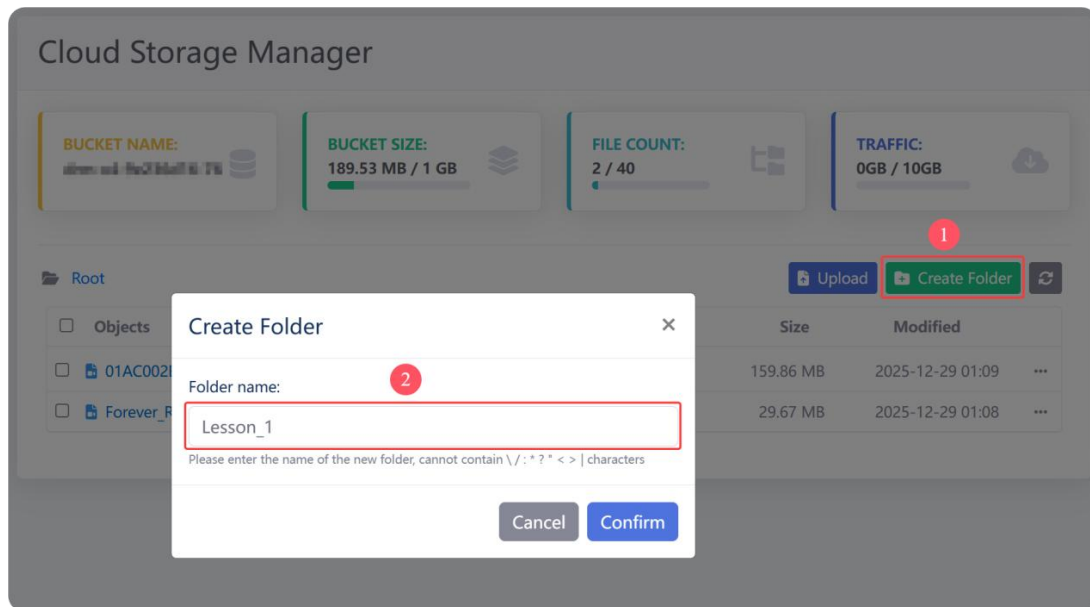

the menu.

The browser will access the full URL of the file, allowing you to download it. You can download the video using a third-party download tool, or access the URL with other mainstream browsers such as Edge, Chrome, or Firefox, then right-click and select “Save As...” to save the video to your local device. (Downloading files will generate traffic usage.)

5.3. Create Folders

- Click the **Create Folder** button on the management page to create a new directory
- If you are inside a subdirectory, a subfolder will be created in the current directory
- Supports multi-level folder creation for structured file management

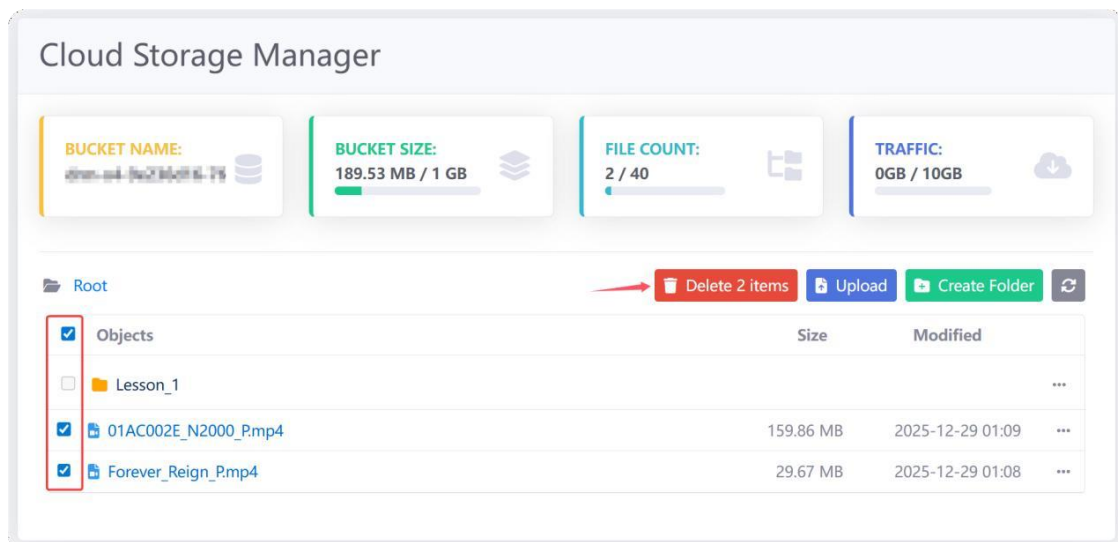

5.4. Delete Files and Folders

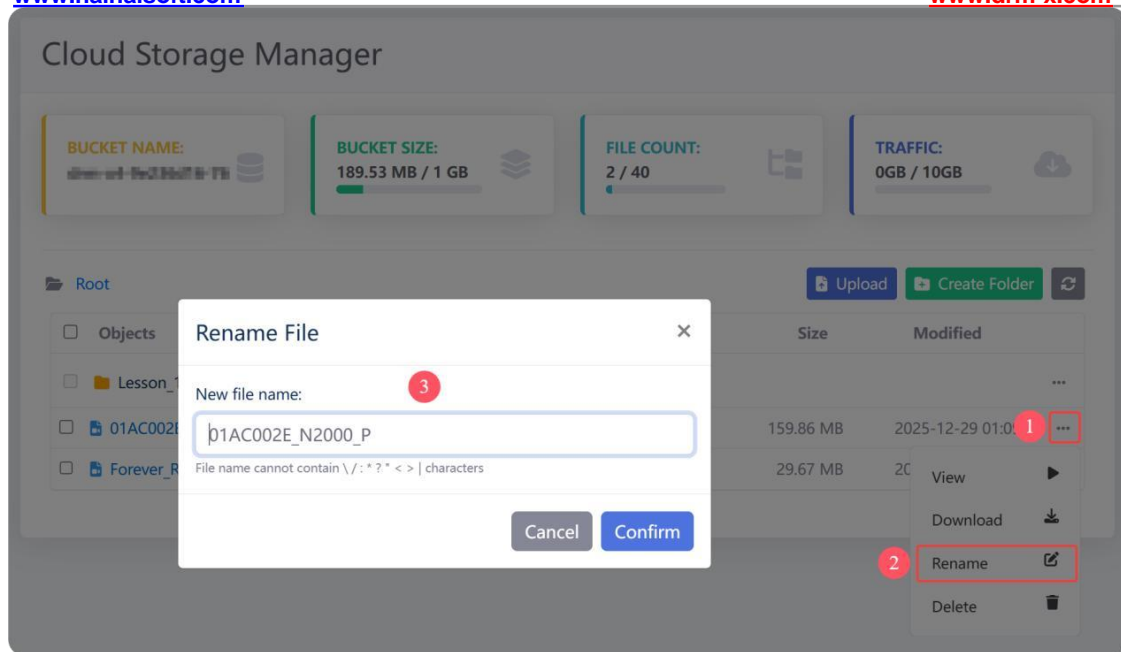

You can click the icon on the far right of the file list and select **Delete** from the menu to remove a file or folder.

Multiple files can also be selected and deleted at once.

Warning: Deleted files cannot be recovered. Please proceed with caution.

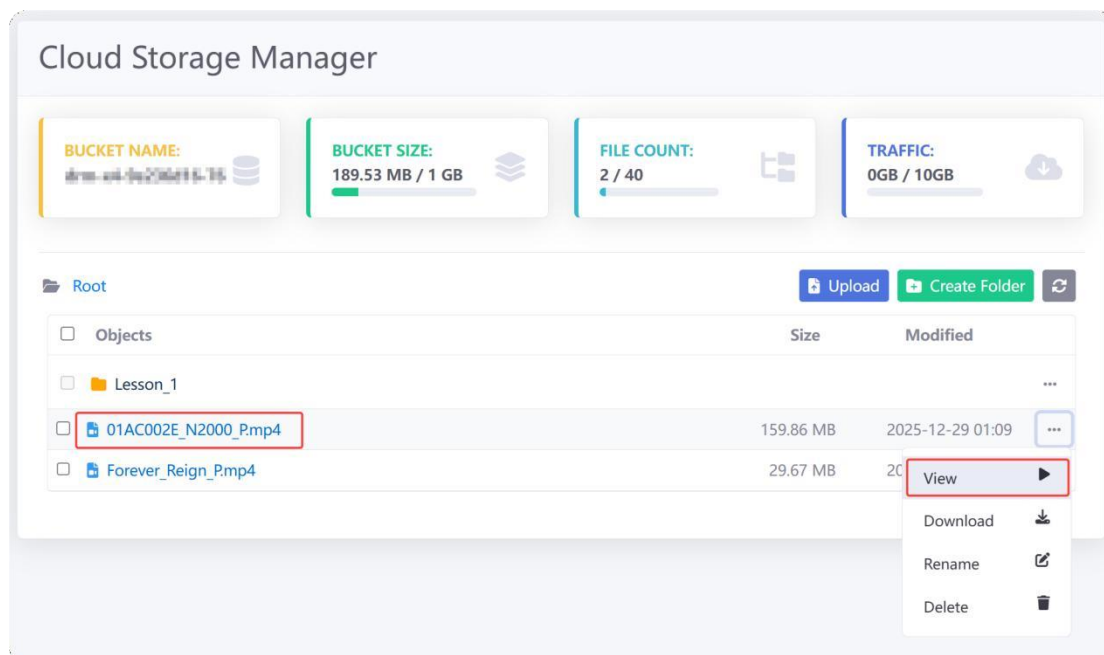

5.5. Rename Files and Folders

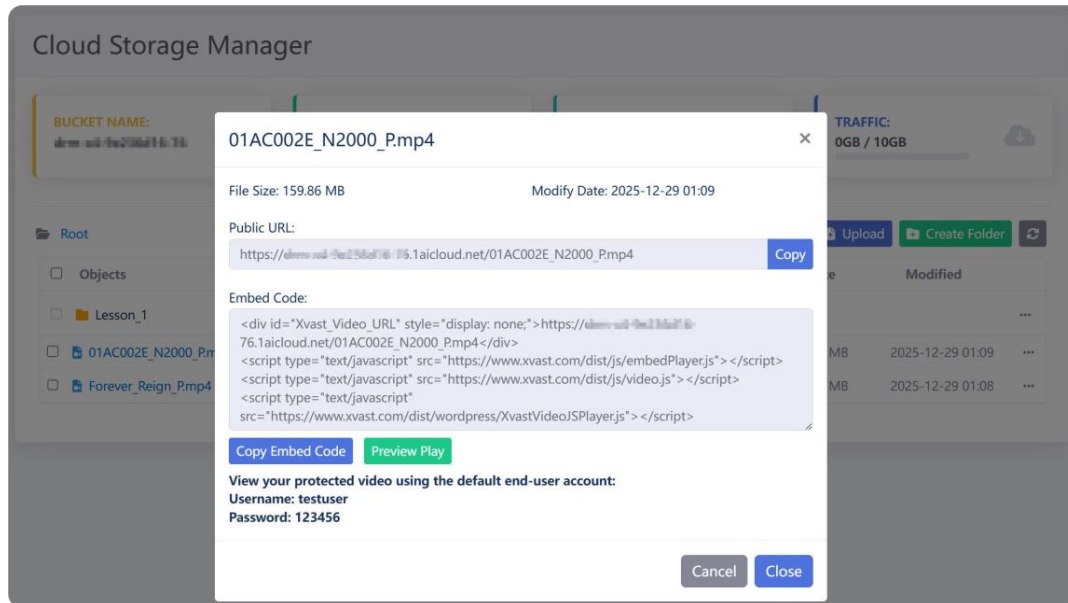

5.6. File Details

Click the file name or the action button on the right side of the file list, then select View to see file details.

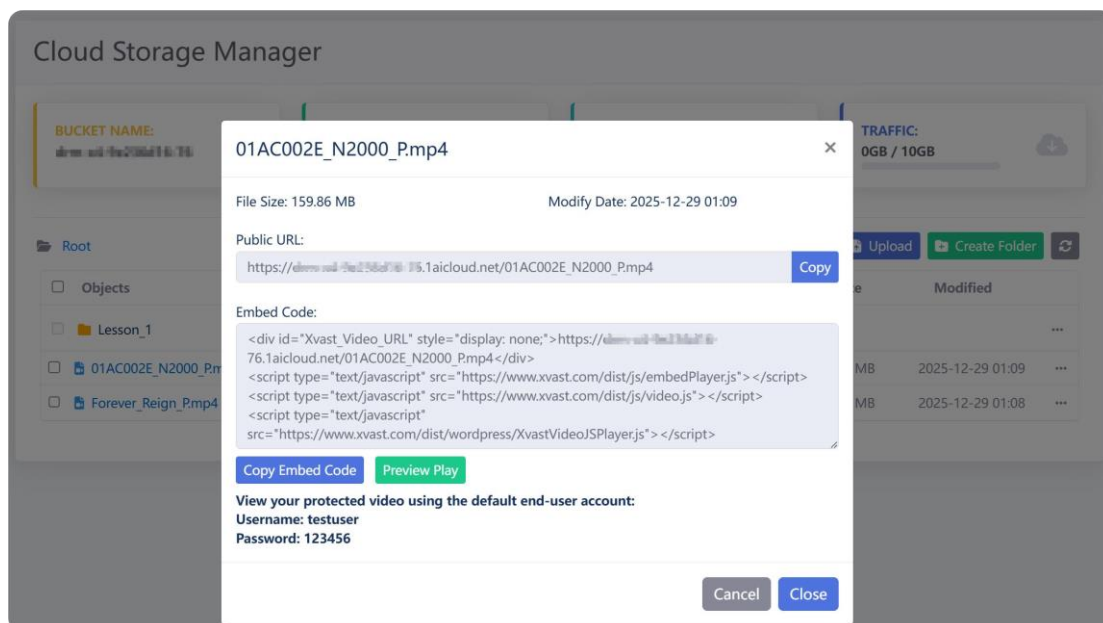

File details include: File name, File type, File size, Last updated time, Public access URL and Video embed code

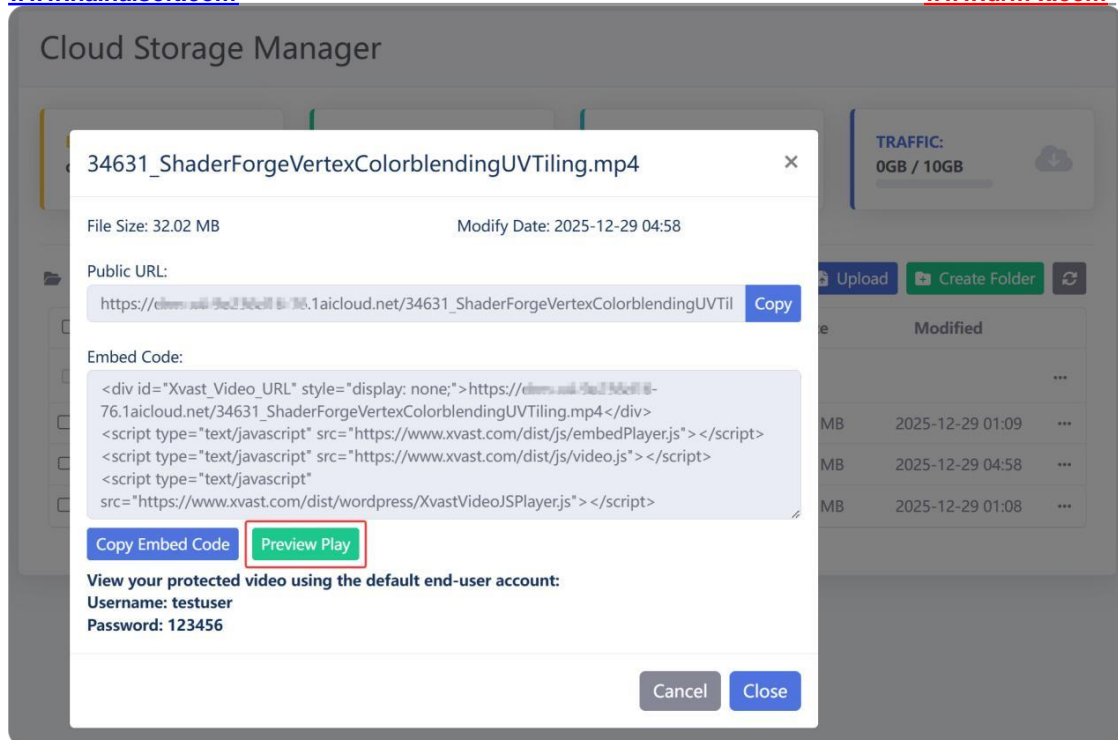

5.7. Video Embed Code

When viewing file details, if the file is a video, the embed code will be displayed. You can copy the embed code and insert it into your video courses or online playback pages.

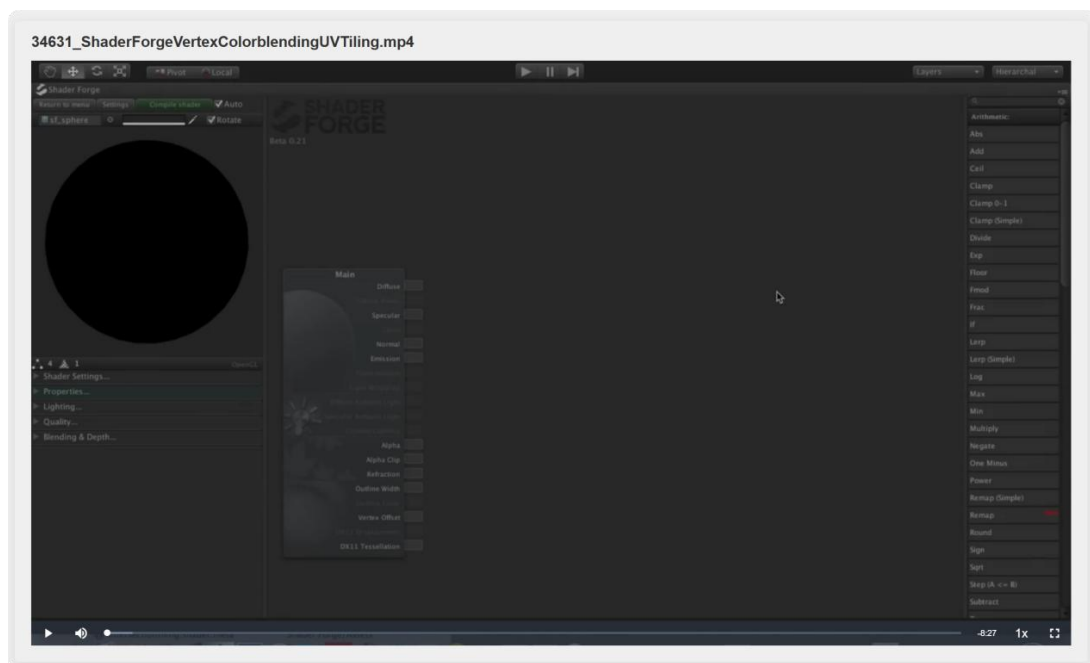

5.8. Online Video Preview

Click the **Online Preview** button in the file details page to play the video online. You have to use Xvast browser to preview video.

If the video is DRM-X encrypted, please login and obtain a license before playback.

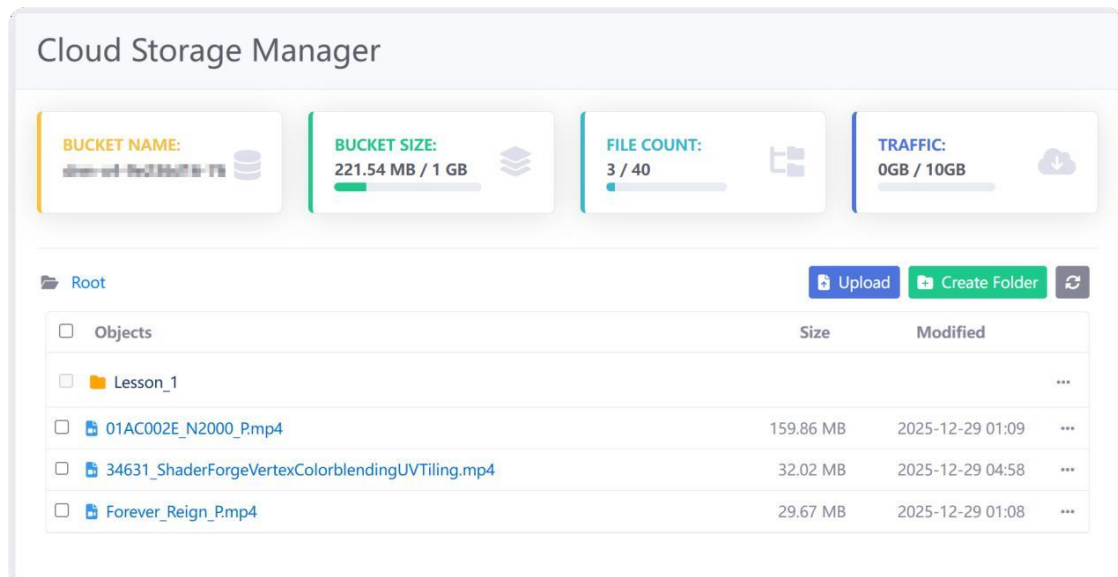

6. Viewing Traffic and Cost Reports

DRM-X 5.0 Cloud Storage provides detailed usage and cost reports.

6.1. Cloud Storage Usage Overview

On the Cloud Storage management page, you can view:

- Storage usage
- File count usage
- Remaining traffic quota

6.2. Daily Traffic and Cost Charts

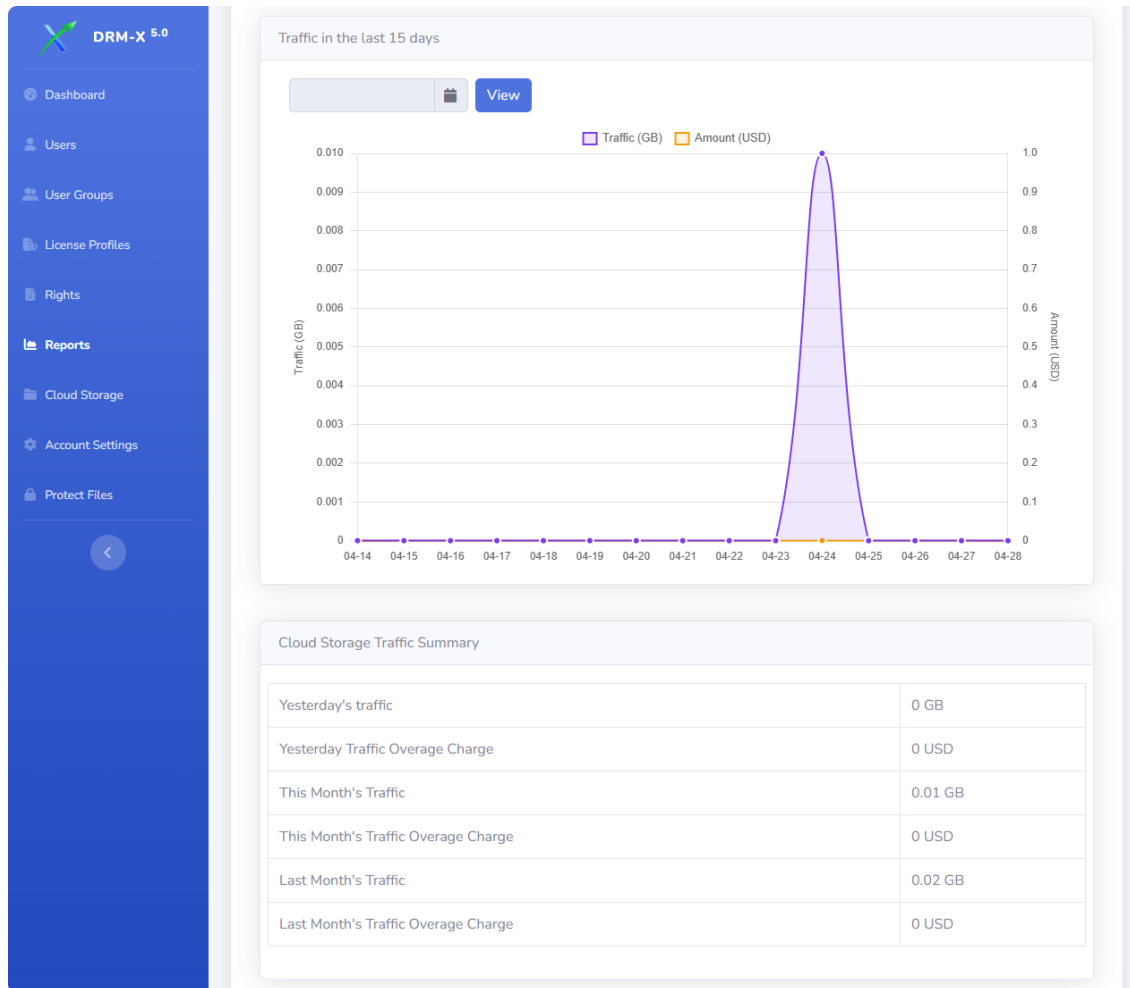

By accessing the [Reports](#) page, you can view cloud storage traffic usage for the most recent **15 days**.

The system displays data in chart form, including:

- Daily traffic usage
- Daily excess traffic costs

These visual charts allow users to quickly understand daily traffic trends

and manage usage and costs effectively.

6.3. Detailed Traffic and Excess Cost List

Visit the [Cloud Storage Traffic Detail Report](#) page to view:

- Daily traffic usage
- Excess traffic costs

Custom Date Range Support

- Customize the start date and end date
- After clicking the submit button, the system generates statistics for the selected period

Within the selected date range, the system automatically summarizes:

- Total traffic usage
- Excess traffic charges

Daily Details Table

The table below the report displays:

- Daily traffic usage
- Excess traffic fees
- Sorted by date in descending order

This allows users to clearly understand daily traffic consumption and cost details, facilitating cost analysis and usage control.

The screenshot shows the DRM-X 5.0 Reports interface. On the left is a blue sidebar with navigation options: Dashboard, Users, User Groups, License Profiles, Rights, Reports (highlighted), Cloud Storage, Account Settings, and Protect Files. The main content area is titled 'Reports' and contains a 'Cloud Storage Traffic Report' section. This section has a 'Please select Date Range:' form with 'From:' and 'To:' date pickers and a 'Submit' button. Below the form is a 'Summary information in the select date range' section with the following data:

Total Traffic:	51.47 MB
Total Cost:	0.0000 USD

At the bottom is a table with the following data:

Date	Traffic	Traffic Cost
04/28/2026	42.71 KB	0
04/27/2026	1.36 MB	0
04/26/2026	263.95 KB	0
04/25/2026	64.01 KB	0
