Overview

After custom login page integration, your users just need to register and login on your own website. It will pop up your website DRM login window when the user opens your protected content.

For the integration, you need to create a new login page or modify your existed login page. It requires some code work. But don’t worry, very simple.

All that you need to do is to call the `getLicenseRemoteToTable` function. You can get the details about DRM-X Web Service by the link below: [http://3.drm-x.com/haihaisoftLicenseservice.asmx](http://3.drm-x.com/haihaisoftLicenseservice.asmx)

What necessary before integration?

1. **DRM-X Account**
   You need to have a DRM-X Premier/ Business Windows/ Business Pro or Enterprise before you can integrate with your platform. DRM-X personal account users can manage it’s users on DRM-X.com instead.

   Click the link below to see the DRM-X Account Comparison.
   [http://www.drm-x.com/Fees-Compare-3.0.aspx](http://www.drm-x.com/Fees-Compare-3.0.aspx)

2. **User database, login page and register page.**
   You should setup a database that can store your users’ information if you want to integrate with DRM-X platform. You also need to create user login page and register page for your users to login and register.
Parameter Introduction

The parameter in blue color is required field. You can set the others into ‘N/A’ (means empty) or enter the correct value.

- **AdminEmail**: your login Email of DRM-X Account.
- **WebServiceAuthStr**: the Web Service Authenticate String for DRM-X web service. The value you set here must be the same with the one on your DRM-X account.

Steps to setup:

1. Login your DRM-X account.
2. Click the **Account Settings** in the left panel and choose the **Website Integration Preferences**, as shown in the screenshot below:

![Account Settings](image)
3. Select **Custom login page integration** and enter the **Web Service Authenticate String**. As shown in the screenshot below:

![Account Settings](image)

4. Click the **Submit** button below and you will get the message shown on the picture below:

![Profile - Website Integration Preferences](image)
- **GroupID**: the ID of your Group created in your DRM-X account. You can find GroupID value in Users Group of DRM-X Account.

Note: in the code you just need to enter one Group ID, and the users signed up on your website will be added into group directly. You can manually change the group they belong to in your DRM-X account if you want.

- **UserLoginName**: the username or unique UserID in your user database.
- **UserFullName**: the Full Name of User. This parameter is option. You can leave this UserFullName parameter to blank, or just set it value to N/A.
- **ProfileID**: the ID of the profile you create on DRM-X. DRM-X provides this parameter.
- **ClientInfo**: the basic client information of your users. DRM-X provides this parameter.
- **RightsID**: the ID of rights that you created in your DRM-X Accounts. DRM-X provides this parameter.
- **IP**: address of your user which acquire license. You can provide this Parameter, or input N/A.
● **Platform:** the operating system of end user, DRM-X will return value: Windows 2000, Windows Server 2003, Windows XP, Windows Vista, Windows 7 or Mac

● **ContentType:** the type of protected content, DRM-X will return Audio/Video or PDF.

● **yourproductid:** the ProductID in your system, please set it in License Profile.

● **Version:** Get HUPlayer/HPReader version.

---

**Step by Step Introduction**

---

**Flow:**
Step1. Open the `index.php` on which your user login or register.

Set cookies to store the value of Profileid, Clientinfo, Platform, ContentType. Shown the sample code below:

```php
<?php
    setcookie("ProfileID", $_REQUEST["profileid"], time()+3600);
    setcookie("ClientInfo", $_REQUEST["clientinfo"], time()+3600);
    setcookie("Platform", $_REQUEST["platform"], time()+3600);
    setcookie("ContentType", $_REQUEST["contenttype"], time()+3600);
?>
```
Step2. Download nusoap.php classes.

Here is the download link to the file:
http://www.drm-x.com/download/nusoap.txt

Please rename the file into ‘.php’ extention after you download it.
To see the instruction about nusoap.php, please click here.

Step3. Add the code below into the licstore.php page.

Please create a new page named licstore.php to call the getLicenseRemoteToTable function, if your DRM-X 3.0 account is Enhanced Security Mode (check account Mode), you need call the getLicenseRemoteToTableWithVersion function.
And then add the code below on the page:

```
<?php
$name = $_COOKIE['username'];
require_once('nusoap.php');
$wsdl = "http://3.drm-x.com/haihaisoftlicenseservice.asmx?wsdl";
$client = new soapclient2($wsdl, 'wsdl');
$client -> soap_defencoding = 'UTF-8';
$client -> decode_utf8 = false;
/*Call DRM-X XML Webservice.*/
$params = array(
    'AdminEmail' => 'support5@haihaisoft.com',
    /*Your DRM-X account login email.*/
    'WebServiceAuthStr' => '123456drm',
    /*This value should be the same with the one on your DRM-X account panel.*/
    'ProfileID' => $_COOKIE['ProfileID'],
    'ClientInfo' => $_COOKIE['ClientInfo'],
    'RightsID' => '390',
    'UserLoginName' => $name,
    /* The user will also be created on your DRM-X account. So you can set the most number of computers the user can login and play your contents. For example, if you
```
set the number to 1, then the user can only play your content on one computer.

Here is the link to how to setup:

*/

'UserFullName' => 'N/A',
'GroupID' => '9550',
/*The ID of the user group you created on DRM-X.com.*/

'Message' => 'N/A',
'IP' => 'N/A',
);
$result = $client->call('getLicenseRemoteToTable', array('parameters' => $param), '', '', true, true);
$license = $result['getLicenseRemoteToTableResult'];
print_r('<html><head><meta http-equiv="content-type" content="text/html; charset=UTF-8"></head><body>' . $license . '</body></html> ');
?>

**Step4. Set DRM-X Website Integration Parameters.**

So it will pop up the index.php when your users play your protected files. You can customize the page whatever you need.

Steps to setup:

1. Login your [DRM-X account](#).
2. Click the **Account Settings** in the left panel and choose the **Website Integration Preferences**, as shown in the screenshot below:
3. Select **Custom login page integration** and enter the URL of your customized page. As shown in the screenshot below:
4. Click the **Submit** button below and you will get the message shown on the picture below:

![Profile - Website Integration Preferences](image)

**Step5: Integration Error Messages**

When you integrate DRM-X 3.0 with your website, it may return some error messages. You should write code check the returned error messages and displays the error messages properly to end users. It will help you and your users identify the error easily. For example: Exceed Bind Number, License Profile doesn't exists, User Group doesn't exists, License Rights doesn't exists and Rights Expired.

1. **Content Provider has insufficient funds in DRM-X 3.0 platform.**
   
   **Message** = "Your remain fund is not enough to pay monthly fee. Please add fund to your DRM-X account. For more information, please visit: http://www.drm-x.com"
   
   **License Return** "ERROR:ADMIN_NO_MONEY"

2. **The Rights have expired, the expiration date is less than the current date.**
   
   **Message** = "ERROR:RIGHTS_EXPIRED"
   
   **License Return** "No License"

3. **Exceeded hardware combined number**
   
   **Message** = "Sorry, you can only acquire license in " & AllowBindNum & " computers. Please contact your content owner for details."
   
   **License Return** "ERROR:EXCEED_BIND"

4. **Common Returned Message**
   
   **Message** = "Webmaster doesn't have the User Group or you don't have permission to access this User Group. Please contact your webmaster for details."
Content provider doesn’t have this user group, or you don’t have permission to access to this User Group.

Message = "Webmaster doesn't have this Rights or you don't have permission to acquire this rights. Please contact your webmaster for details."
Content owner doesn’t have this License Rights, or you don’t have permission to acquire this Rights.

Message = "Webmaster hasn't encrypt this file or you don't have permission to acquire license. Please contact your webmaster for details."
Content owner hasn't encrypted this file (The License Profile does not exist ), or you don’t have permission to acquire this License Profile.

5. Website Integration Preferences error.
License Return “Your XML web service login info is not correct. Please check your AdminEmail and WebServiceAuthStr settings.”.

Step 6. Play your contents protected by DRM-X.

Congratulations! The integration has been done. When the users open your encrypted content, it will pop up the custom login page.
